Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,2,5,7,8,16 rejected under 35 U.S.C. 102(b) as being anticipated by Giddings (Bull. Env. Contam.. Tox., 23,360-364, 1979). Giddings teaches a method of contacting algae infested water with p-benzoquinone to control said algae growth.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 18-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Giddings as applied to claims 1,2,5,7,8,16 above. Gidding teaches all that is recited in claims 18-24 except for the invention comprising the instant amount of benzoquinone to be added to the water or the time period for contact of p-benzoquinone to the algae infested water. It would have been obvious to one having ordinary skill in the art to determine the optimum amount of p-benzoquinone to add to the algae infested water and the optimum time period for p-benzoquinone contact in infested water. One would

Art Unit: 1616

have been motivated to do this in order to develop the most effective invention for the control of algae growth in the algae infested water.

Claim Objection / Allowable Subject Matter

Claims 3,4,6,9-14,17,25,26 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art does not teach or suggest the invention comprising the pests of these claims. The prior art does not teach or suggest the invention comprising ballast water reservoir or 2,3-methoxy-5-methyl-1,4-benzoquinone. Claims 27-31 are allowable. The prior art does not teach or suggest the instant invention being employed to control mollusk.
